International Journal of Mass Spectrometry

Subject Index

Acetaldehyde
"Proton-transport" catalysis in the gas phase. Keto-enol isomerization of ionized acetaldehyde, 161
Actinides
Reactions of actinide ions with pentamethylcyclopentadiene: atypical hydrocarbon activation, 19
Alkali halides
Mass spectrometric study of the molecular and ionic sublimation of cesium iodide single crystals, 121
Alkali metal target
A new technique to study the dissociation of energy-selected neutral intermediates, A1
Americium
Reactions of actinide ions with pentamethylcyclopentadiene: atypical hydrocarbon activation, 19
Analyses
Measurement of lithium isotopic ratios as lithium tetraborate ions, 273
Angiotensin ions
Reactions of angiotensin ions with hydroiodic acid, 299
Atomic weight
Gravimetric preparation of synthetic mixtures of platinum isotopes, 9
Auger deexcitation
On the mechanism of ion stimulated desorption of O^+ from transition-metal surfaces, 199

B3LYP
How does Fe^+ activate ethylsilane? A theoretical study in comparison with experiments, 363
Borinium ions
Generation and characterization of ionic and neutral $(CH_3OBH)^{+/\cdot}$ and $(CH_3BOH)^{+/\cdot}$ in the gas phase by tandem mass spectrometry, 315

Carborane
Ion/molecule reactions of o-carborane(12) and a method for identifying overlapped isotopic distributions in complex mass spectra, 37
Cesium iodide
Mass spectrometric study of the molecular and ionic sublimation of cesium iodide single crystals, 121
Charge-inversion mass spectrometry
A new technique to study the dissociation of energy-selected neutral intermediates, A1
Charge transfer
Charge transfer from neutral perfluorocarbons to various cations: long-range versus short-range reaction mechanisms, 323
Chemical ionization
Gas phase reactions of CF_3O^- and $CF_3O^-\cdot H_2O$ and their relevance to the detection of stratospheric HCl, 207
Chemical ionization mass spectrometry (CIMS)
Chemical ionization mass spectrometer for long-term measurements of atmospheric OH and H_2SO_4, 91
Cluster fission
Multicollision-induced dissociation of multiply charged gold clusters, Au_n^{2+}, n = 7–35, and Au_n^{3+}, n = 19–35, 47
Cluster ions
Secondary cluster ion emission from megaelectron volts ion impacts on $NaBF_4$. 1. Ion decay fractions and dissociation pathways, 111
Collisionally activated dissociation
A low-energy CAD study of the ions $MOH(H_2O)^+$ (M = Mn, Co, Ni, Cu, Zn) and $[M(H_2,O_2)]^+$ (M = Cr, Fe, La, Pr), 251
Collision induced dissociation
Multicollision-induced dissociation of multiply charged gold clusters, Au_n^{2+}, n = 7–35, and Au_n^{2+}, n = 19–35, 47
Collision-induced dissociation threshold
Ligand binding energy in $[(bipy)Rh(P{\equiv}CH)]^+$ by collision-induced dissociation threshold measurements, 1
Crystal defects
Mass spectrometric study of the molecular and ionic sublimation of cesium iodide single crystals, 121
C-Si bond activation
How does Fe^+ activate ethylsilane? A theoretical study in comparison with experiments, 363

Dehydrogenation
Reactions of actinide ions with pentamethylcyclopentadiene: atypical hydrocarbon activation, 19
Density functional theory calculations
Formation, photodissociation, and structure studies of group 14(Si, Ge, Sn, and Pb)/P binary cluster ions, 261
Detector efficiency

1387-3806/00/$20.00 © 2000 Elsevier Science B.V. All rights reserved
PII S1387-3806(00)00370-5

Ion detection efficiency in SIMS: Dependencies on energy, mass and composition for microchannel plates used in mass spectrometry, 217
Dissociation energies
Multicollision-induced dissociation of multiply charged gold clusters, Au_n^{2+}, n = 7–35, and Au_n^{2+}, n = 19–35, 47
Dynamic mass analyzer
Mass spectrometer based on conversion of spectra, 139

Electric pulse generator
Mass spectrometer based on conversion of spectra, 139
Electron transfer
Generation and characterization of ionic and neutral $(CH_3OBH)^{+/\cdot}$ and $(CH_3BOH)^{+/\cdot}$ in the gas phase by tandem mass spectrometry, 315
Electrospray ionization
A comparison of electrospray versus nanoelectrospray ionization Fourier transform mass spectrometry for the analysis of synthetic poly(dimethylsiloxane)/poly(ethylene glycol) oligomer blends, 241
Energy resolution
Mass spectrometer based on conversion of spectra, 139
Error estimates
Chemical ionization mass spectrometer for long-term measurements of atmospheric OH and H_2SO_4, 91
Ethylsilane
How does Fe^+ activate ethylsilane? A theoretical study in comparison with experiments, 363

Flowing afterglow
A flowing afterglow selected ion flow tube (FA/SIFT) comparison of SIFT in- jector flanges and H_3^+ + N revisited, 351
FT/ICR-MS
A comparison of electrospray versus nanoelectrospray ionization Fourier transform mass spectrometry for the analysis of synthetic poly(dimethylsiloxane)/poly(ethylene glycol) oligomer blends, 241
Ion/molecule reactions of o-carborane(12) and a method for identifying overlapped isotopic distributions in complex mass spectra, 37
''Proton-transport'' catalysis in the gas phase. Keto-enol isomerization of ionized acetaldehyde, 161

Gas-phase chemistry
How does Fe^+ activate ethylsilane? A theoretical study in comparison with experiments, 363
G2 calculations
Generation and characterization of ionic and neutral $(CH_3OBH)^{+/\cdot}$ and $(CH_3BOH)^{+/\cdot}$ in the gas phase by tandem mass spectrometry, 315
Gold clusters
Multicollision-induced dissociation of multiply charged gold clusters, Au_n^{2+}, n = 7–35, and Au_n^{2+}, n = 19–35, 47
Group 14/phosphorus cluster ions
Formation, photodissociation, and structure studies of group 14(Si, Ge, Sn, and Pb)/P binary cluster ions, 261

H_3^+
A flowing afterglow selected ion flow tube (FA/SIFT) comparison of SIFT injector flanges and H_3^+ + N revisited, 351
Hexapole
Electric hexapoles and octopoles with optimized circular section rods, 31
High pressure mass spectrometry
On mass discrimination in high-pressure mass spectrometry: potential errors in measurements leading to absolute ion abundances, 147
H_2SO_4
Chemical ionization mass spectrometer for long-term measurements of atmospheric OH and H_2SO_4, 91
Hydrates
A low-energy CAD study of the ions $MOH(H_2O)^+$ (M = Mn, Co, Ni, Cu, Zn) and $[M(H_2,O_2)]^+$ (M = Cr, Fe, La, Pr), 251
Hydroiodic acid attachment
Reactions of angiotensin ions with hydroiodic acid, 299
Hydroxides
A low-energy CAD study of the ions $MOH(H_2O)^+$ (M = Mn, Co, Ni, Cu, Zn) and $[M(H_2,O_2)]^+$ (M = Cr, Fe, La, Pr), 251

Inductively coupled plasma mass spectrometry
Gravimetric preparation of synthetic mixtures of platinum isotopes, 9
Isotope ratio measurements of magnesium and determination of magnesium concentration by reverse isotope dilution technique on small amounts of ^{26}Mg-spiked nutrient solutions with inductively coupled plasma mass spectrometry, 231
Ion
Electron impact ionization and ion chemistry in trimethylaluminum and in trimethylgallium, 345
Ion detection
Ion detection efficiency in SIMS: Dependencies on energy, mass and composition for microchannel plates used in mass spectrometry, 217
Ion energy distribution
Peak shape for a quadrupole mass spectrometer: comparison of computer simulation and experiment, 81
Ionization
Electron impact ionization and ion chemistry in trimethylaluminum and in trimethylgallium, 345
Ion/molecule reactions

Gas phase reactions of CF_3O^- and $CF_3O^-{\cdot}H_2O$ and their relevance to the detection of stratospheric HCl, 207
Ion/molecule reactions of o-carborane(12) and a method for identifying overlapped isotopic distributions in complex mass spectra, 37
Ion-Neutral correlations
Secondary cluster ion emission from megaelectron volts ion impacts on $NaBF_4$. 1. Ion decay fractions and dissociation pathways, 111
Ion optics
Electric hexapoles and octopoles with optimized circular section rods, 31
Ion sampling
On mass discrimination in high-pressure mass spectrometry: potential errors in measurements leading to absolute ion abundances, 147
Ion source converter
Mass spectrometer based on conversion of spectra, 139
Ion tomography
Theory of dipolar dc excitation and dc tomography in the rf quadrupole ion trap, 175
Ion trajectory calculations
Peak shape for a quadrupole mass spectrometer: comparison of computer simulation and experiment, 81
Isotope ratio measurements
Isotope ratio measurements of magnesium and determination of magnesium concentration by reverse isotope dilution technique on small amounts of ^{26}Mg-spiked nutrient solutions with inductively coupled plasma mass spectrometry, 231
Laser ablation inductively coupled plasma mass spectrometry for the trace, ultratrace and isotope analysis of long-lived radionuclides in solid samples, 283
Isotopic abundance sensitivity
Peak shape for a quadrupole mass spectrometer: comparison of computer simulation and experiment, 81
Isotopic reference material
Gravimetric preparation of synthetic mixtures of platinum isotopes, 9

Keto-enol isomerization
''Proton-transport'' catalysis in the gas phase. Keto-enol isomerization of ionized acetaldehyde, 161
Kinetics
Electron impact ionization and ion chemistry in trimethylaluminum and in trimethylgallium, 345

Laser ablation
Formation, photodissociation, and structure studies of group 14(Si, Ge, Sn, and Pb)/P binary cluster ions, 261
Laser ablation inductively coupled plasma mass spectrometry
Laser ablation inductively coupled plasma mass spectrometry for the trace, ultratrace and isotope analysis of long-lived radionuclides in solid samples, 283
Ligand binding energy
Ligand binding energy in $[(bipy)Rh(P{\equiv}CH)]^+$ by collision-induced dissociation threshold measurements, 1
Lithium
Measurement of lithium isotopic ratios as lithium tetraborate ions, 273
Lithium tetraborate
Measurement of lithium isotopic ratios as lithium tetraborate ions, 273
Long-lived radionuclides
Laser ablation inductively coupled plasma mass spectrometry for the trace, ultratrace and isotope analysis of long-lived radionuclides in solid samples, 283
Long-term atmospheric measurements
Chemical ionization mass spectrometer for long-term measurements of atmospheric OH and H_2SO_4, 91
Low energy ion scattering
On the mechanism of ion stimulated desorption of O^+ from transition-metal surfaces, 199

Magnesium
Isotope ratio measurements of magnesium and determination of magnesium concentration by reverse isotope dilution technique on small amounts of ^{26}Mg-spiked nutrient solutions with inductively coupled plasma mass spectrometry, 231
Mass discrimination
On mass discrimination in high-pressure mass spectrometry: potential errors in measurements leading to absolute ion abundances, 147
Mass resolution
Mass spectrometer based on conversion of spectra, 139
Mass spectrometry
Generation and characterization of ionic and neutral $(CH_3OBH)^{+/\cdot}$ and $(CH_3BOH)^{+/\cdot}$ in the gas phase by tandem mass spectrometry, 315
Mass spectrometric study of the molecular and ionic sublimation of cesium iodide single crystals, 121
Oxide ion formation of long-lived radionuclides in double-focusing sector field inductively coupled plasma mass spectrometry and their analytical applications, 69
Mathieu equation
Theory of dipolar dc excitation and dc tomography in the rf quadrupole ion trap, 175
Metal complexes
A low-energy CAD study of the ions $MOH(H_2O)^+$ (M = Mn, Co, Ni, Cu, Zn) and $[M(H_2,O_2)]^+$ (M = Cr, Fe, La, Pr), 251
Metastable dissociation

Secondary cluster ion emission from megaelectron volts ion impacts on $NaBF_4$. 1. Ion decay fractions and dissociation pathways, 111
Microchannel plate
Ion detection efficiency in SIMS: Dependencies on energy, mass and composition for microchannel plates used in mass spectrometry, 217
Multiply charged clusters
Multicollision-induced dissociation of multiply charged gold clusters, Au_n^{2+}, n = 7–35, and Au_n^{2+}, n = 19–35, 47

Nanospray
A comparison of electrospray versus nanoelectrospray ionization Fourier transform mass spectrometry for the analysis of synthetic poly(dimethylsiloxane)/poly(ethylene glycol) oligomer blends, 241
N atoms
A flowing afterglow selected ion flow tube (FA/SIFT) comparison of SIFT injector flanges and H_3^+ + N revisited, 351
Near-resonant electron transfer
A new technique to study the dissociation of energy-selected neutral intermediates, A1
Neutral intermediate
A new technique to study the dissociation of energy-selected neutral intermediates, A1

Octopole
Electric hexapoles and octopoles with optimized circular section rods, 31
OH radical
Chemical ionization mass spectrometer for long-term measurements of atmospheric OH and H_2SO_4, 91
Oxide ions
Oxide ion formation of long-lived radionuclides in double-focusing sector field inductively coupled plasma mass spectrometry and their analytical applications, 69
Oxides
A low-energy CAD study of the ions $MOH(H_2O)^+$ (M = Mn, Co, Ni, Cu, Zn) and $[M(H_2,O_2)]^+$ (M = Cr, Fe, La, Pr), 251

Partially deuterated methanol
A new technique to study the dissociation of energy-selected neutral intermediates, A1
Peak shape
Peak shape for a quadrupole mass spectrometer: comparison of computer simulation and experiment, 81
Pentamethylcyclopentadiene
Reactions of actinide ions with pentamethylcyclopentadiene: atypical hydrocarbon activation, 19
Perfluorocarbons
Charge transfer from neutral perfluorocarbons to various cations: long-range versus short-range reaction mechanisms, 323
Phosphaalkyne
Ligand binding energy in $[(bipy)\,Rh(P{\equiv}CH)]^+$ by collision-induced dissociation threshold measurements, 1
Photodissociation
Formation, photodissociation, and structure studies of group 14(Si, Ge, Sn, and Pb)/P binary cluster ions, 261
Photo dissociation and photodetachment
Formation and photophysics of the van der Waals complex ions $[(NO)_x(N_2O_3)_y(FB)_z]^{+}_{-}$, 55
Plasma desorption
Secondary cluster ion emission from megaelectron volts ion impacts on $NaBF_4$. 1. Ion decay fractions and dissociation pathways, 111
Platinum
Gravimetric preparation of synthetic mixtures of platinum isotopes, 9
Polymers
A comparison of electrospray versus nanoelectrospray ionization Fourier transform mass spectrometry for the analysis of synthetic poly(dimethylsiloxane)/poly(ethylene glycol) oligomer blends, 241
Potential distribution
Electric hexapoles and octopoles with optimized circular section rods, 31
''Proton-transport'' catalysis
''Proton-transport'' catalysis in the gas phase. Keto-enol isomerization of ionized acetaldehyde, 161

Quadrupole
Electric hexapoles and octopoles with optimized circular section rods, 31
Quadrupole ion trap
Reactions of angiotensin ions with hydroiodic acid, 299
Theory of dipolar dc excitation and dc tomography in the rf quadrupole ion trap, 175
Quadrupole mass filter
Peak shape for a quadrupole mass spectrometer: comparison of computer simulation and experiment, 81

Radionuclides
Oxide ion formation of long-lived radionuclides in double-focusing sector field inductively coupled plasma mass spectrometry and their analytical applications, 69
Resonance neutralization
On the mechanism of ion stimulated desorption of O^+ from transition-metal surfaces, 199
Rhodium complexes
Ligand binding energy in $[(bipy)Rh\,(P{\equiv}CH)]^+$ by collision-induced dissociation threshold measurements, 1

Secondary ion mass spectrometry
On the mechanism of ion stimulated desorption of O^+ from transition-metal surfaces, 199
Selected ion flow tube (SIFT)
Charge transfer from neutral perfluorocarbons to various cations: long-range versus short-range reaction mechanisms, 323
A flowing afterglow selected ion flow tube (FA/SIFT) comparison of SIFT in- jector flanges and $H_3^+ + N$ revisited, 351
Si-H bond activation
How does Fe^+ activate ethylsilane? A theoretical study in comparison with experiments, 363
Simulation
Theory of dipolar dc excitation and dc tomography in the rf quadrupole ion trap, 175
Single crystal
Mass spectrometric study of the molecular and ionic sublimation of cesium iodide single crystals, 121
Spectral deconvolution
Ion/molecule reactions of o-carborane(12) and a method for identifying overlapped isotopic distributions in complex mass spectra, 37
Static secondary ion mass spectrometry
Ion detection efficiency in SIMS: Dependencies on energy, mass and composition for microchannel plates used in mass spectrometry, 217
Stationary afterglow
On mass discrimination in high-pressure mass spectrometry: potential errors in measurements leading to absolute ion abundances, 147
Stimulated desorption
On the mechanism of ion stimulated desorption of O^+ from transition-metal surfaces, 199
Stratospheric trace constituents
Gas phase reactions of CF_3O^- and $CF_3O^-{\cdot}H_2O$ and their relevance to the detection of stratospheric HCl, 207
Sublimation
Mass spectrometric study of the molecular and ionic sublimation of cesium iodide single crystals, 121
Synthetic isotope mixtures
Gravimetric preparation of synthetic mixtures of platinum isotopes, 9
System performance
Chemical ionization mass spectrometer for long-term measurements of atmospheric OH and H_2SO_4, 91

Thermionic emission
Mass spectrometric study of the molecular and ionic sublimation of cesium iodide single crystals, 121
Time-of-flight mass spectrometry
Formation, photodissociation, and structure studies of group 14(Si, Ge, Sn, and Pb)/P binary cluster ions, 261
Formation and photophysics of the van der Waals complex ions $[(NO)_x(N_2O_3)_y(FB)_z]^+_-$, 55
Ion detection efficiency in SIMS: Dependencies on energy, mass and composition for microchannel plates used in mass spectrometry, 217
Secondary cluster ion emission from megaelectron volts ion impacts on $NaBF_4$. 1. Ion decay fractions and dissociation pathways, 111
TPEPICO
Charge transfer from neutral perfluorocarbons to various cations: long-range versus short-range reaction mechanisms, 323
Trace analysis
Isotope ratio measurements of magnesium and determination of magnesium concentration by reverse isotope dilution technique on small amounts of ^{26}Mg-spiked nutrient solutions with inductively coupled plasma mass spectrometry, 231
Laser ablation inductively coupled plasma mass spectrometry for the trace, ultratrace and isotope analysis of long-lived radionuclides in solid samples, 283
Transition-metal surfaces
On the mechanism of ion stimulated desorption of O^+ from transition-metal surfaces, 199
Translational excitation
Theory of dipolar dc excitation and dc tomography in the rf quadrupole ion trap, 175
Transuranics
Reactions of actinide ions with pentamethylcyclopentadiene: atypical hydrocarbon activation, 19
Trimethylaluminum
Electron impact ionization and ion chemistry in trimethylaluminum and in trimethylgallium, 345
Trimethylgallium
Electron impact ionization and ion chemistry in trimethylaluminum and in trimethylgallium, 345

van der Waals complex
Formation and photophysics of the van der Waals complex ions $[(NO)_x(N_2O_3)_y(FB)_z]^+_-$, 55
Vaporization
Mass spectrometric study of the molecular and ionic sublimation of cesium iodide single crystals, 121
Venturi injector
A flowing afterglow selected ion flow tube (FA/SIFT) comparison of SIFT injector flanges and $H_3^+ + N$ revisited, 351
